

Phuoc H. Nguyen

Operations Research | Data Systems | Applied AI

ngkenzy@gmail.com | (813) 508-0102 | phnguyen.com | github.com/ngkenzy | LinkedIn

Summary

Operations Research Analyst with 16+ years of Army and DoD experience in analytics, modeling, data systems, and decision support. Currently building decision support capabilities at USARD. Published AI researcher, founder and builder of SOLPIENT Research, and TS/SCI cleared.

Core Skills

Analytics: Operations research, statistical modeling, simulation, predictive analytics, decision support | **Engineering:** Python, SQL, R, Spark, ETL, APIs, automation | **Platforms:** AWS, Databricks, Docker, Git | **AI:** LLM workflows, NLP, AI evaluation, agents

Experience

Operations Research and Data Systems, USARD *Aug 2026 to Present*

- Build the Decision Support Platform, analytical workflows, and data systems for operational decision making.
- Apply operations research, statistics, and automation to recurring mission requirements.

Data Operations Projects Lead / Data Scientist, DoD CDAO *Jul 2024 to Jul 2026*

- Led DataOps work supporting decision support analytics for Joint Staff and Army senior leaders.
- Built and integrated secure data pipelines and analytics across multiple classification environments.

Lead Operations Research Analyst, Army Futures Command / TRAC *Sep 2021 to Jul 2024*

- Led predictive analytics, simulation, and statistical studies supporting Army modernization and force design.
- Delivered quantitative analysis for senior Army and congressional stakeholders.

Cryptologic Officer, NSA / U.S. Central Command *Jun 2018 to Sep 2021*

- Led intelligence and data teams supporting joint operational requirements and mission partner data sharing.

Intelligence and Electronic Warfare Officer, U.S. Army *2011 to 2018*

- Supported cyber, SIGINT, electronic warfare, and all source intelligence missions in joint and forward environments.

Selected Work

SOLPIENT Research, Founder & Builder: Point in time investment research system that preserves each thesis, tracks new evidence, and compares later outcomes with prior assumptions. Live Site | GitHub

Mission Tailor AI: Built a context aware multimodal threat detection prototype during the NDIA Hackathon 2025; tied for second and awarded third.

AI Text Summarization Research: Published research evaluating GPT generated summaries and bias. arXiv

Education

MS, Computer Science, University of Colorado Boulder (in progress) | **MS, Applied Statistics, Analytics, and Data Science**, University of Kansas | **MBA**, University of Kansas | **BS, Mathematics & Economics**, Northern Illinois University

Credentials

TS/SCI Security Clearance with CI Polygraph | CompTIA Security+ | Fluent Vietnamese
